

Design Document Draft v1

By Dr. Daniel Schaeffer

Github Fork: [DrSchaeffer / openEBL-2026-05](#)

Layout File Name: EBeam_Aexl1.gds

Includes:

MZI01, MZI02: Similar MZI Design, no Bends before Splitter, different waveguide shape and length of both arms

MZI11, MZI12: Similar MZI Design, Bends before Splitter, different waveguide shape for output, similar results expected

MZI21, MZI22: Same MZI Design, Bends before Splitter, same waveguide shape and length, similar results expected

RING12Coup0: Bidirectional Ring with “mirror element”, mainly for interest and fun

MZI41: Symmetrical coupler to check for manufacturing quality

MZI51, MZI52: Same MZI Design, no Bends before Splitter, same waveguide shape and length, similar results expected

Cross11: Crossing with 3 Outputs, to check crosstalk

Exp:11: Circuit with various couplers, mainly for interest and fun
